Spectra MEDIX

EMPOWER PROVIDER NETWORKS WITH INSIGHTS TO MINIMIZE RISK, IMPROVE OUTCOMES, AND REDUCE COSTS.

Moving value-based arrangements forward across provider networks is a challenge. The **SpectraMedix VBP Platform** provides health plans with an agile platform that can be configured to guide providers in value-based care programs.

KEY FEATURES

Value-Based Contract Modeling: Automate the modeling of multiple contract types, including shared savings, shared risk, capitation, MLR arrangements, and total cost of care across large, diverse contract portfolios.

Quality Measurement: A quality measures framework that contains a library of HEDIS, NCQA, QARR, AHRQ, and CMS measures, provides a measures authoring tool to develop and track contracts based on customized measures, and ties measures to contract terms.

Data Integration: The ability to process both structured and unstructured data across multiple sources. Historical expertise in complexities surrounding Medicaid, Medicare, and Commercial data aggregation and integration.

Provider Reporting Expertise: Deep experience and proven results in provider enablement—our solutions can solve the complex challenges associated with your population and providers, including provider enablement.

Value-Based Care Analytics: Actionable financial, utilization, and quality analytics and dashboards tied to contract terms to guide decision-making and inform future negotiations and contract development.

Financial Reconciliation: Reconcile contracts on a monthly basis to course-correct as needed and perform a final reconciliation against budget to settle the contract and facilitate payments from payers.

Making an **IMPACT**

The SpectraMedix VBP Platform has enabled our clients to save more than **\$150 million** using our provider engagement, contracting, and performance analytics capabilities for value-based care.

“The ability of the SpectraMedix platform to manage large amounts of data and present back meaningful insights has been a key contributor to the success our TCPI clinicians have had improving health outcomes.”

Mary Franz, Executive Director of HITEC-LA
L.A. Care Health Plan

Here are just a few of the results that have led to client savings:

62% ↓ *Reduction in Preventable ED Visits*

68% ↓ *Reduction in Preventable Hospitalizations*

82% ↑ *Increase in Suicide Risk Assessment of Children*

DIFFERENTIATORS

- A contract modeling solution that allows the ability to transition provider networks through the value-based care paradigm:
 - Customers have shifted networks from pay-for-quality to shared savings to shared risk to near term future capitation.
- Advanced provider enablement, including:
 - Performance with actionable analytics.
 - The ability to generate reports at the practice/TIN and provider/NPI levels.
- The ability to scale and grow your network by:
 - Developing new value-based arrangements with existing networks and outside networks.
 - Empowering providers to take on more risk by leveraging the SpectraMedix Platform.
- Behavioral health and SDoH data acquisition and integration.
- An end-to-end data integration, contract modeling, and performance improvement solution.
- Deeply knowledgeable data and value-based payment teams.

ABOUT US

SpectraMedix believes advanced, applied analytics can change the healthcare value and quality equation. We deliver a tightly integrated set of applications that accelerate performance across the spectrum of value and risk-based arrangements.
